Subject: Proposal for Mobile Recharge Software (Web Based B2B/B2C)

In these days, Mobile recharge business is growing very rapidly and we have an expert team to create more reliable, flexible and accurate software.

We are expert for Mobile Recharge Solution. We develop recharge applications according to our clients and also suggest extra feature if applicable. V2S Infositystem— The teams of experienced software engineers are offering best All in one, Single SIM online Mobile Recharge Software development along with API Integration services at lowest possible cost and guarantee to complete the development work within agreed time period.

V2S Infositystem

Features on B2B

- We will provide prepaid, postpaid, DTH, data card, landline operators.
- Retailer can recharge through SMS, Portal.
- Major services like registration, fund transfer/reverse, balance enquiry, complaint placing can be done using SMS service in our application.
- Instant fund reversal for failure recharges.
- We can integrate multiple different APIs in our application according to client choice.
- Application Admin can join unlimited members in its channel.
- Instant search result and proper reporting modules.
- Business calculator for getting accurate profit and loss day wise.
- Strong database design for accurate results.
- Eye catching design in web templates.
- User friendly panel
- Application Admin have full privilege to change its member configurations and actions.
- We will deliver entire application to its owner (Admin). Means it is not a white label or reseller.

- We can make this application fully white labeled as per clients demand. After this client can sell unlimited white label to their customer. (Dedicated or VPS Hosting required for this service)
- We will provide 24X7 instant technical supports. You can call any time if you are facing any problem in application.
- We will provide 3 months free hosting service and after that client have to pay 550 INR per month for hosting service.
- We will provide 5 pages eye catching HTML design in this package.

We can also able to integrate any LAPU device in our application. Client just needs to provide us its online API.

This application is fully customizable. So if you have any different plan related to software design, we can able to implement this in our application. (Not include in this package.)

Our B2B Application Overview

Application consist four channels.

- Admin (Control panel with full privilege)
- Master Distributor (Can control only its channel distributors)
- Distributor(Can control only its channel retailers)
- Retailer(No control only perform recharge or transactional operations)

Admin Panel Description:

This is a main control panel for this application. Admin have full authority to create/change its channel members. (Master Distributor, Distributor and Retailer)

Admin can join unlimited members in its channel. Admin can transfer unlimited funds to its members and can able to control full funding action for its members. Admin can check all transaction report with full description. Admin can switch recharge API operator wise according to their choice. Admin can block particular operator overall or retailer wise. Admin can check its gross business volume, profit and loss day wise and month wise. Admin can alert their notification to its channel members. Admin can send bulk mail or SMS to its member. Admin have full authority to change its all member's commission.
